

JOB DESCRIPTION

JOB TITLE

Laboratory Analyst (R&D)

REPORTS TO (Line Manager)

R&D Manager

DEPARTMENT OR FUNCTION

Research and Development

OVERALL JOB PURPOSE (statement of main outcomes to be achieved)

Working within the R&D team, reporting on the levels of macro + micronutrients in a variety of sample types to assist the growers to tailor fertigation recipes to match plant uptake/demand.

MAIN RESPONSIBILITIES

- 1. Accurately and consistently perform all sample preparation procedure in a timely manner and in line with laboratory SOP's
- 2. Run samples on laboratory instrumentation independently, checking QC performance and organising re-testing as required
- 3. Examine and integrate all spectra in a consistent and accurate manner in line with analytical norms
- 4. Review and report all analytical results identifying issues/trends and liaising with the R&D manager prior to reporting
- 5. Preparation of all eluent/analytical solutions/standards as per relevant SOP's
- 6. Maintain Laboratory equipment as per relevant SOP's, changing consumable items routinely as required
- 7. Investigate and diagnose minor instrument issues and attempt to rectify under supervision of the R&D manager
- 8. Perform all routine laboratory check (water quality, pH/EC calibration, etc.) as required
- 9. Liaise with 3rd party providers to schedule the routine preventative maintenance of laboratory instrumentation and equipment
- 10. Follow stock control and order all consumables, liaising with suppliers, & maintaining expenditure records to assist with budget control
- 11. Maintain a clean & safe working environment, maintaining the highest standards of housekeeping particularly with respect to storage of materials, chemicals and solvents
- 12. Assist with the creation of site sampling plans
- 13. Assist with the completion of other R&D tasks as required (e.g. Trial data entry, strawberry breeding programme, R&D trials, etc.)

KEY PERFORMANCE INDICATORS (how job success will be assessed)

- **1.** Once all training has been given- the ability to work unsupervised, rectifying the majority of simple instrument issues, with minimal guidance from the R&D Manager
- **2.** All samples analysed, reviewed, and reported to the growers in a timely manner on a right first-time basis
- **3.** Working environment maintained to the highest standards with all materials, chemicals, solvents, etc. stored appropriately

KEY SKILLS & BEHAVIOURS

- **1.** Experience in a laboratory-based environment with some knowledge of chemistry/analytical chemistry preferable
- 2. Has the ability to work independently and efficiently, has patience and importantly initiative. Attention to detail; accurate and detailed record-keeping and reporting; excellent verbal, written, communication and interpersonal skills; planning, organisation and time management skills.
- **3.** Has computer skills including proficiency in Microsoft Office applications (Word, Excel, PowerPoint, and Outlook).
- **4.** Previous experience working with ICP-OES + HPLC instrumentation preferable but not essential
